PROFESSIONAL SUMMARY

Java Backend Engineer with 6 months of experience developing backend services and REST APIs using Java and Spring Boot. Skilled in microservices, SQL databases, JWT authentication, and designing scalable applications. Experienced in building Learning Management System (LMS) modules and financial platform services in Agile environments.

SKILL SUMMARY

Languages: Java, SQL, Python, JavaScript

Frameworks & IDEs: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, IntelliJ IDEA

Tools & Platforms: Git, Docker, Maven, Postman, Swagger/OpenAPI, Linux

Databases: MySQL, PostgreSQL, MongoDB, Redis

Concepts: OOP, Data Structures, REST APIs, Microservices, JWT Authentication, Database Design

Soft Skills: Communication, Problem Solving, Team Collaboration, Technical Documentation

EXPERIENCE

Software Engineer I

NetM Corp Solutions – Ferilion Labs

Oct 2025 – Mar 2026

Bangalore, India

- Developed and maintained RESTful backend services using Java and Spring Boot for Financial and Learning Management System (LMS) platforms.
- Designed APIs for course management, user registration, authentication, and role-based access for students and administrators.
- Implemented modules for course enrollment, assignment tracking, and progress monitoring within the LMS application.
- Integrated MySQL databases and optimized SQL queries to improve application performance and data retrieval.
- Collaborated with frontend and QA teams to deliver new features and resolve production issues in Agile sprints.
- Prepared API documentation using Swagger and participated in code reviews and deployment activities.

PROJECTS

FinCore: Distributed Banking & ATM Microservice

- Designed and developed a banking backend supporting account creation, deposits, withdrawals, fund transfers, and balance enquiries.
- Implemented secure authentication using JWT and maintained transaction records with audit logging.
- Developed REST APIs and integrated Redis caching to improve application performance.

PayStream: Real-Time Payment Processing Platform

- Built event-driven payment services using Spring Boot and Apache Kafka.
- Developed modules for payment confirmations, refunds, and notification services.
- Implemented reliable message processing and error handling mechanisms for payment workflows.

EDUCATION

Master of Computer Applications (MCA)

Chadalawada Ramanamma Engineering College

2023 – 2025

Bachelor of Science (Computer Science)

Loyola Degree College

2020 – 2023

CERTIFICATIONS

IBM SkillsBuild – Introduction to Data Concepts

IBM SkillsBuild – Overview of Data Tools and Languages

HackerRank – SQL Gold Badge
